

## COMP 1451 Lab 9-b ( 10 points )

### Take-home lab

For this lab you will complete the class `MyArrayList` by implementing the `MyList` interface provided. The implementation you write must use an array of `Object`, declared like this:

```
private Object[] theList;
```

To successfully implement the interface you must provide a non-abstract version of all the methods in the interface.

Upload the lab to the appropriate D2L dropbox by the deadline.
