

COMP1911 – JavaScript Workshop

Lab #2

This lab is due via FTP to BCIT's server before the start of the next lesson.

Name your file as `firstname_lastname.html` (e.g. Tiger Woods would submit a file named `tiger_woods.html`).

Use an FTP client to upload your file as follows:

Hostname `myftp.bcit.ca`

Servertype: `FTPES – FTP over explicit TLS/SSL`

Username: your student number (e.g. `A00112233`)

Password: usually, your birth date (e.g. `yymmdd` such as `19801231`)

Port: `21`

Directory: `IN/COMP/1911`

For more information about uploading the file see:

<https://helpdesk.bcit.ca/fsr/sr/network/734.html>

COMP1911 – JavaScript Workshop

Lab #2

Create a javascript / html file that has the following behaviors:

There are four images in the body of the page. They must be named a.jpg, b.jpg, c.jpg, and d.jpg.

After the window finishes loading, (a) all four images must have a green 2px-wide border applied to them using **DOM 1** JavaScript, and (b) all four images must be resized to 100px wide...but only if the browser is Microsoft Internet Explorer; the resizing must be done using **DOM 0**.
